To qualify for the Lipper Mixed Asset Small Company award, a firm must have at least three mixed-asset funds. Small companies are those fund families with assets under management of less than \$40 billion. The lowest average decile rank of the 3-year Consistent Return measure of the eligible funds per asset class and group will determine the asset class group award winner over the 3-year period. In cases of identical results the lower average percentile rank will determine the winner. Consistent Return measure does not reflect sales charges.

Lipper Fund Awards are granted annually to the funds in each Lipper classification that achieve the highest score using the Lipper Leader for Consistent Return methodology, a measure of a fund's historic risk-adjusted returns excluding sales charges, relative to peers. Ratings for Consistent Return are computed for all Lipper classifications with five or more distinct portfolios. The ratings are subject to change every month and are calculated for the following periods: 3-year, 5-year, 10-year, and overall. The highest 20% of funds in each classification are named Lipper Leaders for Consistent Return. The highest Lipper Leader for Consistent Return within each eligible classification determines the fund classification winner over 3, 5, or 10 years. Lipper rankings reflect a fund's historical total return performance, excluding sales charges as applicable, relative to peers as of the above date. The ratings are subject to change every month and are based on equal-rated average of percentile ranks for the total return metrics over the 1-, 3-, 5-, and 10-year periods, if applicable. **Past performance is not a guarantee of future results.** Fee waivers were in place for all or some of the periods listed. #### **Risk disclosures**

Fixed income securities and bond funds can lose value, and investors can lose principal, as interest rates rise. They also may be affected by economic conditions that hinder an issuer's ability to make interest and principal payments on its debt. • The Funds may also be subject to prepayment risk, the risk that the principal of a fixed income security that is held by the Fund may be prepaid prior to maturity, potentially

forcing the Fund to reinvest that money at a lower interest rate. • Funds that invest primarily in one state may be more susceptible to the economic, regulatory, and other factors of that state than funds that invest more broadly. • Substantially all dividend income derived from tax-free funds is exempt from federal income tax. Some income may be subject to the federal alternative minimum tax (AMT) that applies to certain investors. Capital gains, if any, are taxable. • High yielding, noninvestment grade bonds (junk bonds) involve higher risk than investment grade bonds. • International investments entail risks not ordinarily associated with U.S. investments including fluctuation in currency values, differences in accounting principles, or economic or political instability in other nations. • Investing in emerging markets can be riskier than investing in established foreign markets due to increased volatility and lower trading volume. • Investments in small and/or medium-size companies typically exhibit greater risk and higher volatility than larger, more established companies. • Because the Portfolio expects to hold a concentrated portfolio of a limited number of securities, the Portfolio's risk is increased because each investment has a greater effect on the Portfolio's overall performance.
