SUPPLEMENT

for

Delaware Investments Emerging Markets Fund
(the "Fund")

Dated 26 November 2018

DEFINITIONS

In this Supplement, the following words and phrases shall have the meanings indicated below:-

"Fund"	Delaware Investments Emerging Markets Fund;
"Initial Offer Period"	in respect of the Share classes designated in Appendix A as "Extended", the period terminating at 5.00 pm (Irish time) on 24 May 2019, or such other period determined by the Directors in accordance with the requirements of the Central Bank; and
"Sub-Investment Managers"	Macquarie Investment Management Global Limited and Macquarie Funds Management Hong Kong Limited.

INVESTMENT OBJECTIVE AND POLICIES OF THE FUND

Investment Objective

The investment objective of the Fund is to aim to achieve long-term capital appreciation.

As the Fund invests primarily in Emerging Market Countries, investors should note that an investment in the Fund should not constitute a substantial portion of an investment portfolio and may not be appropriate for all investors.

Investment Policies

The securities in which the Fund will invest shall include, but not be limited to, ordinary shares or common stock, ADRs, EDRs, GDRs, preferred stocks, convertible securities, convertible preferred stocks, and warrants (provided that investments in warrants shall not comprise more than 5 per cent. of the Net Asset Value of the Fund). The Fund may also invest indirectly in such securities for investment purposes through the use of any combination of the financial derivative instruments set forth in this Supplement and the Prospectus such as options, futures, and forward currency exchange contracts or otherwise use such financial derivative instruments for investment purposes. The Fund may be leveraged up to 30 per cent. of its Net Asset Value as a result of its use of such derivative instruments. The Fund's investment in derivative instruments will be subject to the conditions and within the limits from time to time laid down by the Central Bank.

Under normal circumstances, at least 80 per cent. of the Fund's Net Asset Value will be in investments of issuers of Emerging Market Countries. The Fund invests primarily in a broad range of equity securities of companies located in Emerging Market Countries. The Fund may invest in companies of any size and may invest more than 25 per cent. of its Net Asset Value in the securities of issuers located in the same country.

Although the Fund invests primarily in companies from Emerging Market Countries, the Fund will also invest in companies that are not in Emerging Market Countries (including, for example, companies in developed market countries and frontier market countries): (1) if the Investment Manager and/or the Sub-Investment Manager believes that the performance of a company or its industry will be influenced by opportunities in Emerging Market Countries; (2) to maintain exposure to industry segments where the Investment Manager and/or the Sub-Investment Manager believes there are not satisfactory investment opportunities in Emerging Market Countries; and/or (3) if the Investment Manager and/or the Sub-Investment Manager believes there is the potential for significant benefit to the Fund.

The Investment Manager and/or the Sub-Investment Manager believes that although market price and intrinsic business value are positively correlated in the long run, short-term divergences can emerge. The Fund seeks to take advantage of these divergences through a fundamental, bottom-up approach. The Fund invests in securities of companies with sustainable franchises when they are trading at a discount to the Investment Manager and/or the Sub-Investment Manager's intrinsic value estimate for that security.

The Fund defines sustainable franchises as those companies with potential to earn excess returns above their cost of capital over the long-term. Sustainability analysis involves identification of a company's source of competitive advantage and the ability of its management to maximize its return potential. The Investment Manager and/or the Sub-Investment Managers prefer companies with large market opportunities in which to deploy capital, providing opportunities to grow faster than the overall economy.

Intrinsic value assessment is quantitatively determined through a variety of valuation methods including discounted cash flow, replacement cost, private market transaction, and multiples analysis.

The Fund may invest up to 10 per cent. of its Net Asset Value in real estate investment trusts ("REITs") provided that investments in REITs will not have an impact on the liquidity of the Fund. The Fund may also invest up to 10 per cent. of its Net Asset Value in open-ended collective investment schemes within the meaning of Regulation 68(1)(e) of the Regulations.

The Fund may invest up to 35 per cent. of its Net Asset Value in fixed income securities issued by companies in Emerging Market Countries or by foreign governments, their agents, instrumentalities, or political sub-divisions; the Fund, however, does not anticipate investing, on a regular basis, more than 10 per cent. of its Net Asset Value in such fixed income securities. The Fund may invest in fixed income securities that are denominated in the currencies of Emerging Market Countries. All of these may be high yield, high-risk fixed income securities.

The Fund may employ derivatives involving transactions such as trading in futures and options and other derivative instruments for efficient portfolio management (i.e. the reduction of risk, the reduction of costs, or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund as described herein and the general provisions of the Regulations) and for currency hedging purposes subject to the conditions and within the limits from time to time laid down by the Central Bank. A description of the techniques and instruments in which the Fund may invest is set out in the Prospectus in the section entitled "Investment Techniques and Instruments". Investment in warrants shall not comprise more than 5 per cent. of the Net Asset Value of the Fund. The Fund may be leveraged up to 30 per cent. of its Net Asset Value as a result of its use of derivative instruments.

It is anticipated that up to 100 per cent. of the assets of the Fund may be comprised of long positions achieved through direct investments and derivatives and that up to 5 per cent. of the assets of the Fund may be comprised of synthetic short positions achieved through derivatives.

To the extent that the Fund's assets are not fully invested in accordance with the objectives set out above, the Fund may invest the remainder of its assets in debt securities with maturities of less than one year, money market instruments, cash equivalents (such as government securities, discount notes, certificates of deposit, bankers acceptances, commercial paper and treasury bills of Investment Grade and which are traded on Regulated Markets worldwide) or may hold cash. The percentage of the Fund invested in such holdings will vary and depend on several factors, including market conditions. For temporary defensive purposes, including during periods of high cash inflows, the Fund may depart from its principal investment strategies and invest part or all of its assets in these securities or may hold cash. During such periods, the Fund may not achieve its investment objectives.

The Base Currency of the Fund is the US Dollar.
